DETAILED ACTION

Reissue Applications

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a) (1) and MPEP § 1414.

The error is listed as:

“Independent claim 1 includes limitations on the thickness of various elements, including adhesive layer thicknesses and heights of bond wires. These limitations are believed to render the original patent wholly or partially inoperative because it is believed to be narrower in scope than I had the right to claim in the patent.”

Claims 1 – 2 and 13 - 35 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. Patent No. 5,291,062 issued on March 1, 1994 from an application filed on April 6, 1993. The Reissue application which is reissue application 09/427123 which is the parent of the present reissue application was filed on 10/21/1999 which is outside the two year statutory period. No reissued patent shall be granted enlarging the scope of the claims of the original patent unless applied for within two years from the grant of the original patent. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would not have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.
